

The Bay Area Environmental Science Institute presents...

Earth and Human Activity

May 14, 2016

San José State University

Next Generation Science Standards core idea “Earth and Human Activity” supplies an engaging context for helping students to understand the real-world relevance of science, technology, and engineering. This workshop will supply an overview of two aspects of how people depend upon and change our planet: **mineral resources** and **climate change**.

You will also be introduced to a NGSS-aligned middle school science curriculum from the Green Ninja that engages students around creating solutions that make the planet cleaner and healthier.

When and Where

Saturday, May 14, 2016

9 am- 3:30 pm in Duncan Hall Rm 306

Presenters

Elizabeth Walsh (Science Education Program/Meteorology and Climate Science) and
Ellen Metzger (Science Education Program/Geology)

Participants will receive

Ready-to-use classroom activities and the option to earn 0.5 unit of Geology 104
