

Rocks and Minerals

WHAT

- Experience examples of NGSS-aligned lessons
- Collaborate with other science educators
- Learn strategies for connecting the NGSS to California's Environmental Principles and Concepts
- Connect concepts from Earth science, Life Science, and Chemistry

Workshop Topics include:

- Earth materials: their properties, uses, and the processes that form and recycle them through time
- Rocks and minerals found in California and the Bay Area
- Minerals needed for high tech and transitions to clean energy
- Mineral resources, consumption, and challenges for the future

WHO

This **free** workshop is designed for **teachers of grades 6-12**. Pre-service teachers and others interested in science education and the NGSS are also welcome to attend.

PRESENTERS

LeAnne Teruya and **Ellen Metzger** (SJSU Geology/BAESI).

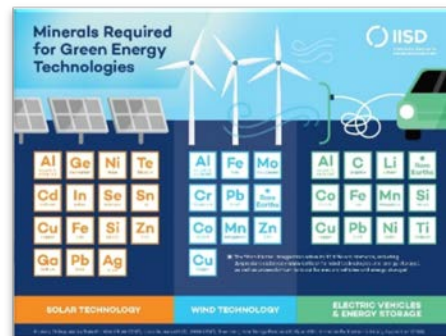

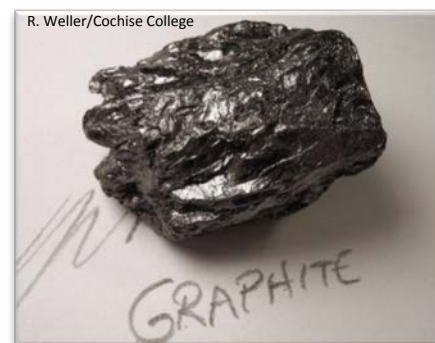

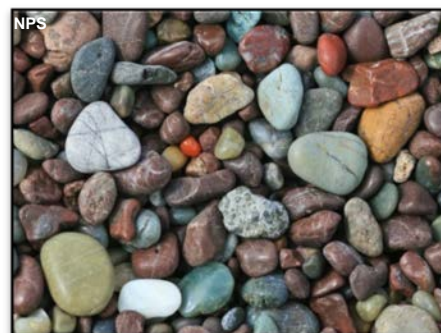

WHEN AND WHERE

- Saturday, April 27, 2019
- 9 am – 3:30 pm in Duncan Hall Rm 306, San Jose State University
